U. F. A. Against Aid To Beet Grower

REFUSES TO RE-AFFIRM 1927 RESOLUTION

Farmer's Parliament refuses to re-affirm 1927 resolution urging aid to Sugar Industry lest it be construed as favoring higher tariff—Want freer world trade.

Reconsidering a resolution passed by this year's convention urging the Dominion government to "adopt such measures to encourage and stabilize this industry as shall be alike beneficial to the growers of sugar beets, the manufacturers of the refined product therefrom and the consumers of sugar in the Dominion of Canada," because it might be interpreted to mean a refutation of the declared opposition of the U. F. A. to a protective tariff, the convention late Friday evening voted down the resolution affirming the stand taken a year ago and defeating the above stated resolution.

An additional resolution brought in by the resolutions committee after re-drafting placed the convention on record in favor of the world free trade and in the meantime supporting a general policy of substantial reductions in the tariff.

Another asking for the abolition of beer parlors was adopted. The resolution had been passed by the U. F. W. A. convention and was endorsed by the U. F. A. gathering.

Establishment of old age pensions at the 1929 session of the legislature prior to any enlarged system of highway construction or other large material projects was sought from the provincial government in another resolution.

(From the Lethbridge Herald)

RAYMOND HI DEFEATS STIRLING HI

The Raymond High School added to their victories Friday night by taking the game from Stirling with a score of 18-80. The game was very one sided. The score shows the team work displayed by the R. H. S. H. Christensen was referee. The line up:

Raymond: Van Orman—14, G. Snow—9, O'Brien—26, Nilsson 23, West—2, Rolfe—20, Strong—2, Walker—2, total 80. Stirling: Ogden, Hirsche, Hill—2, Gibb—4, Zaugg—2, Larson—8, Larson—1, Adamson—1, total 18.

The Raymond Hi will meet the Magrath Hi on the H. S. gym floor Friday.

R.H.S. NOTES

The High School staff have organized the "Awkward Squad," all students causing disturbances in the halls are required to join. The students possessing over energy Wednesday night were Stony, Joe, Firey, and Frex. To get rid of the surplus they were marched up and downstairs twenty six times. Thursday night Henry, Tump, Curt, Stony, Snag, Stub, Davy, and Frex were marched around forty six times.

"Sorrel and Son" Coming To The Capitol

The Capitol Theater management takes great pleasure in presenting the most appealing photoplay ever filmed "Sorrel and Son" with an all star cast. This picture comes with a personal guarantee and recommendation from the management. Remember the dates—days starting Thursday January 31.

Don't forget Ramona is playing to-night and Saturday at the Capitol. We expect to break all house records, so please come early.

Winning Oration

"Canada Among the Nations" (By Orphia Vance)

Canada as our grandfather knew it was a group of insignificant colonies; as our fathers knew it, a self governing Dominion looking for all guidance from No. 10 Downing St., Canada as we know it is a vigorous young nation among the world's nations. Our Canada not a mere dependency but a partner in the great commonwealth of British nations, a nation of equal status; a leader among nations, and aspiring as her highest ideal of leadership in the old slogan of "Peace on Earth God will Toward men."

Now if Canada maintains the slogan what can her position among the nations of the world be, but an enviable one. She does not necessarily need to be a commercial leader, nor an educational leader nor again a financial leader, but the Peaceful Nation is the loved nation of all nations.

In a brief overview of the history of our country we must see it has been for years a peaceful one. It is true that we have been involved in Imperial wars of the past such as the Boer War and struggles of that type but in the great war Canada was forced to defend the rights of smaller nations, to maintain Democracy and to promote everlasting peace. Let us for moment look to the south of us to our national boundary, and what do we see; a boundary line of approximately 4,000 miles, not a soldier, not a gun, not a fortress, and for one hundred and fourteen years it has been so.

Yes Canada primarily a Peace Nation. A peaceful nation is a progressive nation. When in 1919, the Peace Conference met in Paris, Canada insisted that she be represented by plenipotentiaries. The British government concurring Sir Robert L. Borden, Premier of Canada and the Hon. Chas. J. Doherty were Canada's representatives.

Canada's Plenipotentiaries affixed their signatures to the Treaty of Versailles, and Canada's parliament ratified the treaty. This might be regarded as a landmark in Canada's coming of age as a nation.

The Imperial Conference of 1926 took full account of all the new developments of Canada and defined clearly the status of the self-governing Dominions and their relation to each other and to the motherland in the following terms contained in the report of the committee of Inter-Imperial Relations.

The committee are of the opinion that nothing would be gained by attempting to lay down a constitution for the British Empire. Its widely scattered parts have very different characteristics, and different histories, and are at very different stages of evolution; while considered as a whole it defies classification and bears no real resemblance to any other political organization which now exists or has ever yet been tried.

Speaking in London, on Nov. 24th 1926 at the conclusion of the conference, The Right Honorable Mackenzie King, Premier of Canada, said: Speaking for Canada, I know I can say that the pride of our people will be not in what has been gained but rather in what the conference has recognized as having been attained and as now no longer open for debate.

(To be continued next week.)

Municipal Election Feb. 11

Mayor Cope, Three Councillors And Two School Board Members Go Out

As a well known citizen of our community says, "It won't be long now." Election is drawing very near now. Are you interested? Are you prepared to vote? Have you in mind men to fill the various vacancies? Will you be satisfied if those men going out should be re-elected?

Now is the time to state your views not after election. We are all inclined to take the matter lightly, and then when such a problem as graveling these roads comes up and those placed at the civic head should decide to go ahead with such an undertaking a kick would no doubt be registered by those who sat by the fire the day of election. Understand I do not say this graveling problem is a reality as yet, but it's coming. "It won't be long now."

The first Monday in February between the hours of 11 and 12 A. M. nominations will take place. Election will take place the following Monday, and the new officers will be sworn in the following Monday.

The following officers terms have expired: Mayor P. W. Cope, Councillor Will Meeks, Wilford Meldrum, and Will Lunn. Members of the School Board J. U. Aird and Will Christie.

AN AUTOMOBILE SCRAMBLE

VANCOUVER.—Every paved street in Vancouver was turned into a skating rink early this morning when a sudden drop in temperature froze a light fall of rain.

Stalled cars, wrecked cars, disabled cars, were littered along all thoroughfares. Perhaps the most novel incident occurred on west Fourth ave. A big truck was unable to make the grade and commenced a slide astern. The quick-witted driver took a rope and moored his runaway to a telephone pole.

Brakes were of little use as cars simply slid and skidded. Here and there along all main arteries the monuments to people's misplaced trust were moored on side hills like abandoned bulks, crumpled against curbs which cut off wheels like cheese, or thrust onto lawns and against lamp standards.

"PICKLES" DUE TO ARRIVE AT THE OPERA HOUSE WED. NIGHT

A full barrel of the finest varieties of "Pickles" will be opened at the Opera House Wednesday evening. The barrel contains 75 varieties all all bubbling over with melodies and comedy.

After two months of strenuous rehearsing, the group under the supervision of the combined first and second ward M. I. A's, are about ready to present "PICKLES", a delightful light opera in three acts.

Incidentally, this is the first time in the history of Raymond that local talent has attempted to produce a royalty musical comedy. The task has been a huge one, but those responsible for the undertaking report satisfactory progress in the preparation of the fine production.

The scene of the delightful musical comedy goes back to the beautiful city of Vienna, the land of romance and song, where gypsy life in the big outdoors reveals a plot to steal the beautiful daughter of a millionaire. The mystery involves a search for the missing one and introduces many dramatic scenes to recover the long lost one.

The entire production sparkles with the best comedy seen on a local stage in years. The dialogue intermingled with catchy songs, choruses and dances will create an atmosphere that is only witnessed on real occasions here.

The entire group consists of over 75 people 15 principals players, a 12 piece orchestra, and a chorus of over 50 men and women. The special electrical effects will be a special feature of the production of "PICKLES."

One of the more important features discussed by the farmers at the convention of the U. F. A. held at Edmonton was the probable increase in the gasoline tax. A resolution was put before the convention which carried by a large majority ask that the government increase the gasoline tax from three to five cents per gallon "provided a satisfactory plan is brought into operation of exempting gasoline for tractor purposes."

Probable serious disaster was avoided yesterday when a fire under the large stove in the Utah Cafe was discovered before it had done any serious damage. Live coals from the stove were responsible for the flame, which smothered by the stove did not gain much headway but smoldered for several hours before being discovered.

RURAL EDUCATION IN ALBERTA

Copies of a pamphlet entitled "Rural Education in Alberta," have recently been sent out from the office of Hon. Perren Baker, Minister of Education, to each rural school board and teacher in the province and to the locals of other rural organizations interested in educational matters. This contains an outline of the changes in the school system to be introduced to the Legislature at the coming session. Additional copies of this publication may be secured at any time from the Department of Education.

PROVINCE COLLECTING HISTORICAL MATERIAL

In the Provincial Library, under the direction of Hon. George Hoadly, there is a branch of Archives of the Province in which a large amount of source material of Alberta history has been gathered. This branch is anxious to secure any manuscripts or journals containing the memories of early settlers which will serve as a historical record of the beginnings of community life, or any information respecting the existence of the same; also any existing early photographs of important persons and events. Communications dealing with the above may be addressed to Mr. J. A. Jaffary, Provincial Librarian and Archivist, Edmonton.

WILL IMPORT 2,000 PHEASANTS

Of interest to sportsman in the province will be the announcement that some 2,000 Mongolian and Chinese ring-necked pheasants will be imported during the coming summer by the Calgary Fish and Game Association. These birds will be liberated through out the southern part of the province where 1,800 were placed last year as part of the game association's plan for restocking Alberta's game bird supply.

FRANCE AND ENGLAND TO BE CONNECTED BY HUGE TUBE UNDER CHANNEL

The English government in connection with the French government are considering seriously the building of large tubes under the English channel to connect the countries by rail. Such a movement will cost millions, but in this fast day and age where time alone is worth fortunes such an undertaking would no doubt be of great benefit to both countries.

Annual Rate-payers Meeting Tonight

YOU ARE URGED TO ATTEND

Every one is urged to attend the ratepayers meeting tonight to be held at the High School building.

This is a meeting everyone should be deeply interested in. A complete report of the Sec. of the Town will be given showing where your money is being spent with regard to town affairs.

This is the meeting where your views will be considered pro and con. This is the place to register any complaint rather than make them at home. This is the place to register your approval.

Mr. Will Redd has a very favorable report to make, after attending the U. F. A. Convention at Edmonton. He comes back and tells us that in all probability the Provincial government will make the road leading from the main highway, on the east of us through Raymond, Wellington and Lethbridge, a secondary highway and will gravel same if the municipalities will raise one half the money the government will raise the other half. There already exists an agreement between towns and the provincial government that where a gravel road comes to both sides of a town the government will connect the two roads through the town by supplying half the money for graveling.

Such an important program should be carefully considered by everyone in this district. Community improvement as long as it comes within reasonable bounds of that communities resources should be pushed by all. Because your grandfather crossed the ocean in a sailing vessel in no reason that you should not cross by the fast steamers of today. Because your grandfather crossed the plains by ox teams is no reason that you should not cross by the Limited Express. Because your father drove over these roads in the old buckboard with grey and the black is no reason that you should not drive over them in your modern automobile, and if you do you will agree that modern progression demands better roads.

Now is the time to strike while the iron is hot.

Another very important phase of the meeting will be the report of the Sec. of the School board.

Let us urge again the necessity of your being to this meeting.

BETTER GROWING IN TABER BARNWELL DISTRICT PAY WELL

The crop survey just issued shows that in the area mentioned 2,269 acres of beets were harvested in 1928 yielding a tonnage of 18,795 tons. At \$5 a ton, below the actual payment made to the growers, the beets gave the farmers \$180,368.

It is expected that the Taber-Barnwell district will add close to 4,000 acres of beets this year with another 2,000 acres on the Lethbridge North-

SCOTCH LASSIES FIGURE IN FISH WIVES DANCE

This will be one of the outstanding features of the first Sea Music Festival held at Vancouver January 23-26, under the auspices of the Canadian Pacific Railway. Headquarters of the festival will be at the Hotel Vancouver and an unique programme of sea chanties, songs and dances will be given by distinguished singers, fine instrumentalists and well trained artists, under the musical direction of Harold Eustace Key.

"Rastus, is my bath warm?"
"Yesah, the wannest Ah was evah in."

"Are you the groom?" ask the bewildered old gentleman, at a very elaborate wedding
"No sir," was the reply of the embarrassed young man, "I was eliminated in the preliminary try-out."

I crept upstairs, my shoes is band.
Just as the night took wing—
And saw my wife fur feet above.
Doing the same thing.

Western Canada in the Spotlight

The attention of people in all parts of Canada, and, in fact, of the world, will be directed to the prairie provinces of this Dominion during the next few months in a way and to an extent probably unprecedented in the history of any country, by reason of the applications to the Dominion Parliament for charters to build many hundreds of miles of railway in the northern portions of Manitoba, Saskatchewan and Alberta.

Both the Canadian Pacific and the Canadian National Railways are asking Parliament for power to enormously extend their lines into the north country, and both announce their eagerness to proceed with the work of construction with the least possible delay. There is the keenest kind of rivalry between these two giant systems for rights into certain sections of this territory, with the result that a battle royal will take place at Ottawa when Parliament assembles.

One thing emerges quite clearly from the situation that has developed with almost startling suddenness, and that is, that, despite all former statements and predictions to the contrary, the railway managements of Canada are now convinced of the enormous wealth of natural resources in the more northerly portions of Canada and of the success of the Hudson Bay Railway and Hudson Bay route to the markets of the old world.

There had long been a suspicion in the minds of many Western people that the former opposition in Montreal and other Eastern centres to the construction of the Hudson Bay Railway was based, not on their professed scepticism as to the feasibility of the route, but because of their belief that the route would prove to be an unqualified success, with all the upheaval which the opening of this short route from the heart of the prairies to the markets of the world would cause in existing transportation conditions, rates, and routing of traffic.

Examination of the plans of the railways, as thus far outlined, indicate a reversal of formerly held views that the people of Western Canada should be served by lines running east and west, with all the tremendous production of the prairies moving out either to the Atlantic or the Pacific seaboard, and all our imported products coming in through the same ports. Now, both of the great railway companies appear to be determined to connect up their east and west lines by short branches here and there and the construction of great north and south main lines, all stretching hundreds of miles north of existing settlement and heading towards tidewater in the north. A veritable railway revolution is in prospect.

This declaration of absolute confidence in the northern half of these prairie provinces, and in the Hudson Bay outlet, evidenced by the willingness of the biggest financial men in Canada interested in the C.P.R. to expend tens of millions of dollars in northern extensions, will attract the attention of the whole world and will constitute the greatest publicity this section of the Dominion has ever received.

Regardless of the decisions reached by Parliament as to division of the northern territory between the rival systems, and the respective zones to be allotted to each, the result will be to roll back the map of Canada hundreds of miles. The old reproach and weakness of Canada that it consisted of a narrow strip of more or less settled territory extending thousands of miles from the Atlantic to the Pacific along the Canada-United States boundary line, is to be removed. To the Dominion will be given great depth as well as great width, and what for centuries has been looked upon as barren wastes of extensive territory, but of no value, will become a storehouse of treasure, the development of which will add enormously to the population and wealth of the Dominion, providing new avenues of employment, and diversified employment at that, for the people of Canada.

Utilizing Coal Resources

The new Fuel Research Laboratories of the Department of Mines at Ottawa, were designed and the equipment selected with a view to carrying out investigations which would be in the interest of the development of the coal resources of the Dominion.

Fresh Supplies In Demand

Wherever Dr. Thomas' Electric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

Canadian Cheese

The production of factory cheese in Canada in 1926 amounted to 171,731,031 pounds. The value was \$61,763,390.

Proves Columbus Was Spaniard

A document found in the archives of Pontevedra Parish, mentioned that place as having been the birthplace of Christopher Columbus. It thus bears out the claim that the discoverer of America was a Spaniard and not a native of Genoa, Italy. The document contained a description of the burial of Columbus.

Frenchman Invented Eyclet

French celebrated recently the centenary of the birth of the metal eyclet. Francois-Jean-Guillaume Gobin-Daudo was the inventor. The first application of the eyclet was to corsets and it gave that industry a great impetus. Eyclets later were put in shoes.

Suake bites kill more than \$1,000,000 worth of cattle in Texas each year.

Alberta's Peer's Estate

Estate Of Earl Of Egmont Estimated To Approximate One Million Dollars In Value

That the estate to which the Earl of Egmont, of Priddis, Alta., has fallen heir, will approximate one million dollars is an estimate made at Calgary with his assistance.

The bulk of the estate comprises Avon Castle, the family seat at Ringwood, Hants, and 1,309 acres surrounding it.

Some \$40,000 has been spent lately in improving the land and the residence, declared the new earl.

In addition, he says, there are investments in stocks and shares and in war bonds amounting to a large total.

A STOMACH RESTORER

Good Advice From One Who Had Suffered Much

Discomfort after eating, gas pains in the intestinal tract, pains around the heart, sour risings in the throat called heartburn, are common symptoms of dyspepsia. It is a condition often neglected until it has done permanent harm, yet the treatment is simple. The great contributing cause to this trouble is thin blood. Good blood and plenty of it is required by the stomach to function properly. If the blood is thin the stomach becomes sluggish, food lies undigested, gas forms causing pains, often around the heart. Instead of getting nourishment from the blood the system gets poison. The proper treatment is to enrich the blood, and there is no other medicine can do this as promptly or as effectively as Dr. Williams' Pink Pills. The sole mission of these pills is to make new, rich, red blood, which reaches every organ and nerve in the body, and thus not only banishes indigestion and dyspepsia, but also all other troubles having their origin in weak, watery blood.

The splendid results following the use of Dr. Williams' Pink Pills is shown by the case of Mrs. Lucy A. Cushing, a former resident of Kempton, N.S., but now living with her son at West Bethel, Me. Mrs. Cushing says:—"I have no hesitation in strongly recommending Dr. Williams' Pink Pills. For years I was a great sufferer from indigestion. Always after eating I suffered from pains in my stomach and other distressing symptoms that accompany this ailment. I tried different doctors while residing at my old home and also at West Bethel, but without getting relief. I was advised by a friend to try Dr. Williams' Pink Pills. I did so and I must say that I am feeling very grateful ever since to the good friend who gave me the advice. I soon found the pills helping me and by the time I had taken nine or ten boxes I was completely restored to good health. Though I am now in my 76th year I am feeling as well and smart as I did at 35, and an enjoyable life once more." You can get these pills through any dealer in medicine, or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Speakers At Dinner Of Canadian Society

U.S. and Canadian Senators Guests At Function In New York

The Canadian Society of New York helped to strengthen the North American entente cordiale by bringing together as their guests at their annual dinner two senators, one from the Canadian Upper Chamber, Hon. C. P. Beaubien, K.C., and the other from the United States House, Hon. Simon D. Fess, of Ohio. The speakers dealt with the aspirations of the two countries.

Senator Fess frankly discussed the two chief issues now agitating the Congress, the Kellogg treaty and the new cruiser program, and he readily supported both. The United States, he declared, should not put any obstacle in the way of the effort to banish war.

Senator Beaubien reviewed the development of Canada in recent years and painted a glowing picture of the Dominion's future.

"Canada, with a vision quickening and widening, has remained sober-minded, fairly traditional, and, I think I can add, hardworking and still law-abiding and God-fearing," he said.

"When you grow up you shall be a gentleman."
 "I don't want to be a gentleman. I want to be like you, daddy."
 —Jugent, Munich.

Shows Canada's Loyalty

London Paper Expresses Appreciation Of Reverse To Penny Postage

The London Sunday Times in an editorial headed "Canada leads the way," welcomed the increased British immigrant quota as emphasizing the practical loyalty of Canadians to their British stock, but fears that the proper advantage may not be taken of it in Great Britain. The newspaper quotes further encouragement both of propaganda and finance. The Sunday Times also expresses appreciation of the penny postage and finds in it "a signal proof of Canada's strong imperial sentiments."

After urging Hon. Winston Churchill, chancellor of the exchequer, to follow Canada's example the Sunday Times advocates a common empire stamp which, it states would have a real psychological value as a symbol of imperial unity.

LAXATIVE FOR BABY THAT "STAYS DOWN"

Baby's tiny system rebels against castor oil and strong purgatives; but here's a medicine that just suits him. And it does the work quickly and so gently that baby doesn't feel it. Fletcher's Castoria is soothing, cross, fretful babies and children to sleep and making the feverish, constipated, upset ones well and happy, in millions of homes today. Castoria is purely vegetable, harmless and endorsed by the medical profession. Avoid imitations. The Chas. H. Fletcher signature marks genuine Castoria.

Kellogg Explains Treaty

The Paris pact for renunciation of war commits none of the signatories to it to go to war in defence of any country attacked in defiance of the treaty. Secretary of State, Frank B. Kellogg, informed the Senate committee on foreign relations during the recent hearings. He added that Canada made it plain that the Dominion would not be a party to the treaty unless that was understood.

An acquaintance says the most undesirable place in the world to live is beyond one's income.

New Metallurgical Discovery

New Process Said To Make Carbon As Strong As Iron

What is called "the most important metallurgical process since the discovery of steel" is announced in an advertisement by the Elstein Electro-Chemical Process, Ltd., published in the London newspapers.

Materials which are non-conductors of electricity can now be electroplated, according to the claim made by this company, which asserts that wood, silk, porcelain paper and all metals can henceforth be coated with a surface of non-corrosive metal. As a result of the treatment even such flimsy materials as cardboard or plywood can be given the strength of iron and made resistive to the corrosive action of steam, heat, chemical fumes and water, it is declared.

Fortification of the frail fabric of airplanes and airships to the strength of steel, and solution of the boat-builder's problem by entirely metalizing craft of every description, are among the claims made for the new invention. Woodwork and textiles can be similarly metallized, it is asserted.

The advertisement asserts that the British Admiralty and Air Service have ordered articles on which the electro-chemical process has been successfully used.

Needed Some Practice

Aunt: "Johnnie, why is it that you never remember to say 'Thank you'?" Johnnie (eyeballing wistfully a box of chocolates on his aunt's knee): "I expect it's 'cause I don't get enough things given to me to practice."

Awful Asthma Attacks Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rests its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of success in almost every part of this continent, and even beyond the seas.

A python 25 feet long, a giraffe 20 feet tall, an elephant weighing four tons and an insect measuring 12 inches are among the "records" of the London zoo.

Minard's Lintment prevents Flu.

For Colds -

How many people you know who end their colds with Aspirin! And how often you've heard of its prompt relief of sore throat or tonsillitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have often told you Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is a Trademark Registered in Canada

ASPIRIN

Simple Precautions Against FLU

Sore Throat —

— The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

Good and Poor Crops Cost About the Same, But Profits Come From Use of Good Seed

Outside of a little extra expense in harvesting, the cost of producing a good crop and a poor one is about the same, but the profits to the grower of the two vary greatly. Usually an average crop barely pays the cost of growing, and a poor one registers a loss. On account of the overhead, which remains fairly constant, despite the yield, it is of prime importance to the producer to get the very highest returns possible from his land. In this connection the seed used is one of the most important factors. Farmers have no control over sunshine, moisture or storms. They have little protection against early or late frosts, but they have very definite control over seed.

It is to get producers to exercise this control that the Provincial and Federal governments are co-operating in putting on better seed campaigns. "Clean, sound, plump, well graded seed will produce from 10 to 100 per cent. more crop than weed-infested, ungraded seed," states Hon. John S. Martin, Ontario's Minister of Agriculture, who points out that increased crop yields lower the cost of production and that the lowering of this cost is the best way to increase farm products. He advises the purchasing of the seed supply from reliable seed houses or careful growers, from which, incidentally, the seed houses purchase their supplies, which are cleaned up by them and government graded before being offered for sale.

Not only does dirty seed produce a smaller crop for every seed sown, because the poor grain will not yield as high an average as plump, clean graded seed, but there is a direct loss from the growth of the weeds in this supply. Weeds occupy a considerable portion of the land that should be occupied by the grain, and, in addition to this, going to seed usually before the regular crop is ready to harvest, they pollute the land for another year.

The cost of the seed is a minor factor. According to the Dominion Bureau of Statistics, the average yield of oats in Canada for the last ten years runs slightly under 31 bushels per acre, which at current prices are worth about \$18. The extra cost of good, clean, graded seed over the commercial variety to seed one acre of oats would not amount to more than a dollar, but where this good graded seed is used, the return should run, according to Government figures, at the very least 40 bushels to the acre. In other words, for an expenditure of only one dollar the returns in dollars and cents would be increased by over \$5 per acre.

Subject To Revision

Overheard in the fur trade—two salesmen speaking:

"Vat was your holiday business, Maurruss?"

"Hundert und ten thousand dollars, Sidney."

"Vot!"

"As true as I'm alive. How much you get?"

"Hundert und thoidy thousand."

"Vy you lie to me?"

"Well, you come down a leetle, I come down a leetle."

Immigrants Arrive

The first party of immigrants from Canada under the provisions of the £10 fare scheme worked out by the British and Canadian government with the steamship companies, arrived recently in Halifax on the Cunarder Antonia and the White Star liner "Laurentic." They are entrained soon after arrival for placement on Canadian farms.

A young man can spare the arm that it takes to hug a girl while driving, but he can't spare the mind that it takes to operate the arm!

The Purser's Reward

Received Two Half-Crowns From Millionaire For Special Attention

This story is told of a remarkable case of self-control in one of the largest liners on the Atlantic service. The owners of the ship had given instructions that a certain millionaire who was a passenger should receive special attention, and that everything should be done to make his trip thoroughly enjoyable. The purser saw to it that these instructions were carried out to the letter and the favored passenger was treated like a royal personage. So far so good.

At the end of the voyage the purser received a visit from him. "I just wanted to tell you that I'm very grateful for all you have done for me," he said. "This has been the most delightful trip I have ever made, and I feel I'd like to make you a little present." With these words the millionaire pushed through the grill of the purser's office two half-crowns.

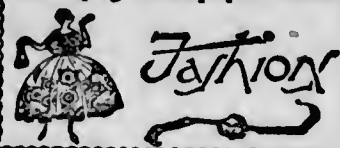

Without the flicker of an eyelid the purser picked up the coins. "Thank you very much, sir," he said. "It is most kind of you." Then passing the money over his shoulder to a very subordinate member of his staff, he added: "But I think this present should be given to Mr. So-and-So, here, sir. You see, he's a married man."

Medicine Hat Greenhouse

Expansion Plan Is Necessary To Meet Volume Of Trade

Although the Medicine Hat Greenhouses, Limited, has 170,000 chrysanthemums, 26,500 roses, and 84,000 carnations in bloom during December, the directors, at the quarterly meeting held the other day, unanimously agreed that expansion was necessary and authorized Fred Ware, the manager, to proceed with a \$20,000 addition, which will embrace five greenhouses, augmenting the eight and a half acres already under glass.

Winnipeg Newspaper Union

Darling Rompers

Something new in rompers for wee fashionables of 2, 4 and 6 years. It has raglan sleeves gathered into narrow bands. The rompers are straight at front, with tiny gathers at neck, which is finished with a band collar. They close at back with a drop seat, with left leg left free, and finished with button and buttonholes, which gives it an unusually smart effect. Patch pocket at right side for "hanky." They are adorable in pale blue satin finish cotton broadcloth with white linen collar band, cuffs and pocket with blue bone buttons. Candy stripe percale with plain pique in predominating tone, kindergarten prints in nursery rhymes, Nile green chambray with white pique, tan cotton rep with brown rep, French blue wool jersey with tan jersey, and printed pique with plain pique are practical suggestions for Style No. 344. Pattern price 25 cents in stamps or coin (coin is preferred).

Slaves To Ambition

Men Not Wholly Successful Who Cannot Enjoy Leisure

How much of your time and vitality should you give to business? This eternal question is raised afresh by the death of George H. Jones, chairman of Standard Oil of New Jersey, at 56, a victim of overwork. A poor boy, he early determined to prove helpful to his family. He became devoted to his job, made progress, found more and more to do, did it with zest and enthusiasm, took no time off for play. By the time he had won financial independence he had lost all taste for recreation. He was a chronic addict to work, more work and still more work. He was rewarded by election to the chairmanship of the greatest Standard Oil company of them all. Devoted associates and friends strove to induce him to relax. But his love for work had become incurable. And now he is dead, 20 years before his time.

Other men, not a few, are leading similar lives, shutting out all but their daily round of onerous duties. Ambition enslaves them. They find satisfaction only in achievement. But each achievement proves merely a stepping stone to a fresh achievement. Only sickness, then death, can stay them.

Theodore Roosevelt declared he would rather wear out than rust out. But does the pace that kills pay in the end? In my humble judgement, that man is not wholly successful who cannot so organize his activities as to permit of a rational amount of leisure, relaxation and enjoyment of social pleasures.

Fertilizing Strawberries

Subject Studied By Treating Plants With Different Fertilizers On Different Dates

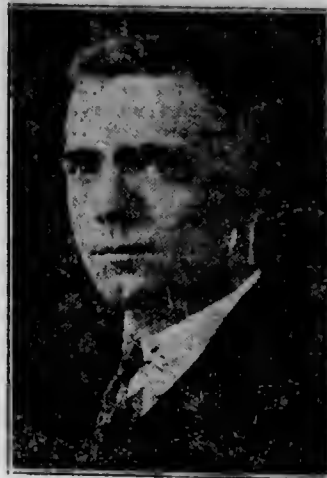

Unless crop growers who use commercial fertilizers make a study of the effects of applications to crop much valuable material may be lost. A study of the subject by the horticulturists of the Department of Agriculture, at Ottawa, leads to the conclusion that the season of application is a highly important factor where there is a deficiency of any particular plant food. The usefulness of spring applications of nitrogen, it was found, is largely dependent upon the growth conditions of the plant in the previous fall. In a study of the subject the strawberry was used and treated with different fertilizers at different dates. The work was done by M. B. Davis and H. Hill, of the Horticultural Division of the Experimental Farms, and is described in a new pamphlet numbered 96, of the Department of Agriculture, which shows in colored plates the appearance of the foliage of plants grown separately under conditions of deficiency in nitrogen, potash and phosphorus. It was clearly brought out that plants have been starved during the fruit bud formation period for either element, very early spring correction of the starvation results in increased flower production and consequent yield of fruit.

Winter Flying In Canada

The handicaps of winter flying in Canada have now been largely overcome. Year-round operations are increasing, greatly to the benefit of the operating companies which can now keep their aircraft in constant work.

Parson: "do you know where little hoya go to when they smoke?" Boy: "Yes, up the alley."

ASSISTS INDUSTRY

A. T. ROBLIN,

To help locate and assist in the development of new industries in the Province of Saskatchewan will be the work of A. T. Roblin, who has just been appointed Canadian National Railway's industrial agent, with headquarters at Saskatoon. Mr. Roblin was born at London, Ont., 32 years ago, and has been with the National system for 13 years. The establishment of the new office in Saskatoon is in keeping with the rapid development of Saskatchewan and the policy of the Canadian National Railways in "keeping abreast of the progress of the Dominion."

Arranging For Speed Tests

British Auto Racer Expects To Travel 240 Miles An Hour

Preparations are under way by the contest committee of the American Automobile Association to arrange for Major H. O. D. Segrave, British racing driver, to conduct speed tests at Daytona Beach, Fla., where he expects to travel 240 miles an hour.

Segrave's machine, the "Golden Arrow," is constructed on radical ideas of streamlining, the association announced, and is expected to gain speed through design rather than brute strength.

The machine is powered by a 13-cylinder Napier airplane engine with the hood fitted over the engine like a glove. The length of the car over all is 25 feet, and its width six feet. It weighs two and one-half tons.

In first gear the machine is said to make 80 miles an hour, 160 miles an hour in second gear, and more than 240 miles an hour in top gear.

Ice may be used to cool the water used in the engine.

Speed tests at Daytona Beach are expected to start in March, the association said.

The present record of 207.552 miles an hour is held by Ray Keech, American driver.

Educating the Negro

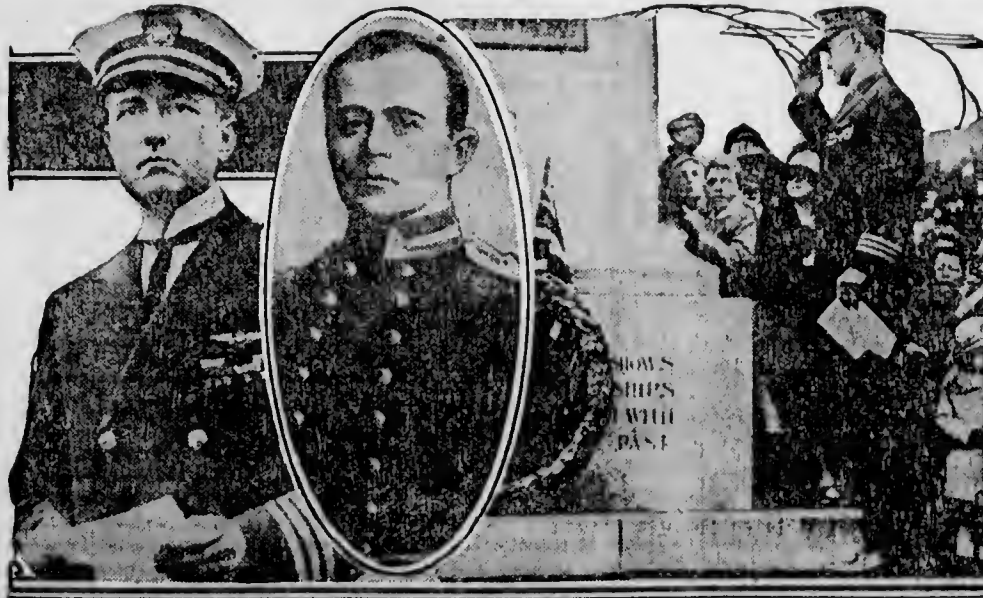

During the last ten years, colleges for negroes in the United States have doubled in number, and have increased their enrolment six hundred per cent. Special attention is being given to the training of men and women for professional work, and yet there is but one negro physician amongst 3,343 of the negro population, while there is one white doctor to every 53 whites.

Rubbing It In

Miss Leftover—Dad's going to give me a carved cedar hope chest for a birthday present.

Miss Tarte—That'll be nice. Cedar's mothproof, so your things will keep years and years in it.

PAYS TRIBUTE TO DEAD EXPLORER

En route from the United States to Antarctic in an attempt to reach the South Pole by air, Commander Richard E. Byrd, stopped over at Christchurch, New Zealand, to lay a wreath upon the memorial erected there to Captain Robert Falcon Scott, the British explorer, who reached the South Pole on January 17, 1912, but who lost his life on the return trip, dying of cold and starvation when within eleven miles of one of his food and supply depots. In the illustration the American leader is seen as he appeared at Christchurch while delivering a eulogy of the Briton's achievement and character. (2) is a picture of the late Captain Scott, while (3) shows Byrd saluting the Scott memorial at Christchurch, after having placed a wreath at its base.

The Staggering Load Carried By the British Government As A Result Of the Great War

Flower Guide For All Canada

A New Edition Of a Most Useful Work Is Now Available

The bulletin "Annual Flowers," issued by the Department of Agriculture, at Ottawa, although published in large editions has had to be repeatedly reprinted to meet an extraordinary demand for it. A new edition of this wonderful useful work by Miss Isabella Preston, specialist in ornamental horticulture at the Experimental Farm, Ottawa, is a very attractive booklet, which not only describes the thousands of varieties but shows many of the blooms arranged in vases, as well as general views of flower beds and borders.

This bulletin is useful as a guide in all the provinces, as it gives the names of twelve varieties that have done best at each of the twenty-one Experimental Farms and Stations distributed over the different provinces.

This booklet, which is Bulletin No. 60, and available at the Publications Branch, Department of Agriculture, Ottawa, is a trustworthy guide to one when studying the seed catalogues that arrive in the homes at this season of the year.

Lead Production In Canada

Greater Part Of Lead Produced In Canada Mined In B.C.

Much the greater part of the lead produced in Canada comes from the refinery at Tadanac, British Columbia, which treats lead concentrate from the Sullivan lead-zinc mine at Kimberley. The output of this mine far exceeds that of all other Canadian lead mines put together. There is also a considerable production from numerous silver-lead and silver-lead-zinc mines in the Kootenay districts and other parts of British Columbia. The Yukon output is silver-lead ore from the Mayo district; that of Ontario is derived from galena, at the Galletta mine, in Carleton County; and Quebec's output is lead concentrates from the Notre-Dame-des-Anges lead-zinc mine.

Keeps Things Shining

United States Ships Shoo Polish To Many Nations

Uncle Sam is one of the world's busiest boot-blacks. He helps shine the shoes of other nations.

This became evident when the Department of Commerce announced that 2,781,829 pounds of shoe polish valued at \$766,326 was shipped by American firms to other countries during the first ten months of 1923.

The greater part of this went to provide glittering shoes and boots for Cubans, Canadians and South Americans. Europe, the report showed makes most of her polish at home.

Housewife (employing new girl)—I hope you had no quarrel with your last mistress when you left her?

Maid—Oh, no! She was taking a bath and I just locked her in, took my belongings and left.

By religion, the Tamil Indian will not eat flesh.

Research Bureau

Empire-Wide Research Bureau Would Greatly Benefit Canada

In the opinion of Dr. J. H. Grisdale, Deputy Minister of Agriculture, and others sponsoring the Empire-Wide Research Bureau, the Dominion will stand to benefit materially by such an organization. The Bureau will give special study to soil science, animal nutrition, animal health, animal genetics, agricultural parasitology, plant genetics and fruit production. The chairman is Sir Robert Greig, who is chairman of the Scottish Board of Agriculture, and was a recent visitor to Canada.

Oldest British Doctor Dead

Sir David Maurice Serjeant, believed to be England's oldest doctor is dead at the age of 99. A poet as well as a man of medicine, the late Sir David Serjeant had a long and varied career. He was knighted at the age of 91 for his patriotic poetry.

A group of Indian women, aided by English and American women, are actively working for the betterment of women in India.

"Come here and be spanked, Toto."

"But I haven't done anything."

"No, but I shan't be here tomorrow to see your school report."

—Pete Mele, Paris.

CONSTIPATION RELIEVED QUICKLY

CARTER'S LIVER PILLS

This Purely Vegetable Pill will move the bowels without any pain and depressing after effects. Sick Headache, Indigestion, Biliousness, Bad Complexion quickly vanish. Children and Adults can easily swallow Dr. Carter's tiny, sugar coated pills. They are free from calomel and poisonous drugs. All Druggists 25c and 75c red pkgs.

WORLD HAPPENINGS BRIEFLY TOLD

The Kellogg anti-war treaty has been ratified by the Senate at Washington.

An increase of \$25,000,000 in the fund for prohibition enforcement has been approved by the U. S. appropriations committee.

Captain Hermann Koehl, pilot of the first westward trans-Atlantic airplane, Bremen, was injured at Arosa, Switzerland, when he crashed while ski-ing.

American "Friends of the Prince of Wales" have come forward with an anonymous gift of \$100,000 for the relief of distress in the coal fields, it was announced in London.

It is understood the salary of Sir Basil Blackett, newly appointed chairman of the merger company controlling Imperial wireless and cable communication will be \$10,000 a year.

A fund opened by a Toronto newspaper for relief of the unemployed of Great Britain reached a total of \$28,094. The money was sent to swell the Lord Mayor's fund being raised throughout Britain.

It has been decided that the United Service Institute, a scientific and literary body composed of military, naval, air force and Royal Mounted Police officers of the capital and district, is to be organized and incorporated.

An attempt is being made to persuade a 154-year-old Turk to visit Canada as mascot of a football team according to Z. G. Bejanoff, of Constantinople. Two sons, aged 120 and 90, are assisting in the attempt to persuade him.

Searchers recovered the bodies of three Alpine climbers who were buried by an avalanche while climbing Mount Jovee with eight other climbers. The accident occurred near the summit of the mountain, which is 8,000 feet high.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

An editorial typist has lost her job for sending this to a contributor: "The editor regrets that he is unable to make use of the enclosed owing to lack of space."

The Friend Of All Sufferers.—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquired for.

Disgruntled Patron (leaving cinema)—"I've never seen a rottener picture!"

Commissionaire "Ever 'ad yer photo took?"

Always Keep Cuticura Preparations On Hand

The Soap, because of its absolute purity and emollient properties, is unsurpassed for every-day use. Assisted by Cuticura Ointment it does much to keep the skin and scalp healthy. Cuticura Shaving Stick makes shaving easy for tender-faced men. Cuticura Talcum is the ideal toilet powder.

Sample Each Free by Mail. Address Canadian Depot: "Blenheim, Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

Industrial Manitoba

Agriculture Has Now To Take Second Place To Manufacturing In Western Province

Agriculture now has to take second place to industrial manufacturing in Manitoba, according to figures of the Industrial Development Board. An estimate made by the Board places the output of manufactured goods in Manitoba this year at \$159,252,000, as compared with \$132,000,000 during 1927. The agricultural wealth produced in 1927 was placed at \$147,000,000.

"Flu" "Flu" "Flu" It Is Everywhere

DANGEROUS PNEUMONIA MAY FOLLOW UNLESS A GOOD RECOVERY IS MADE

With so much Grippe and Flu about, no one can afford to neglect even a simple cold. For a real protection against "Flu" many experienced nurses advocate the following simple treatment.

Put in saucepan containing one pint water on the stove; then add one-half teaspoonful of Catarrhazone, and bring to a boil. Bend over the steaming water; wrap a towel over your head so that it also covers the face. Let the steam rise so you can inhale it. Breathe in the vapor deeply. The healing fumes of Catarrhazone will quickly disinfect your nose throat and lungs. Flu germs are destroyed.

You can prevent Grippe, Flu and Influenza by using Catarrhazone. It is healing, soothing, safe and efficient. To stop colds, sore throat, or Catarrh, nothing is more satisfactory than Catarrhazone. Even to sit in a room with Catarrhazone Vapor rising from a pan of boiling water is a wonderful protection to children and over-comes all sorts of winter coughs and colds. All druggists sell Catarrhazone, 50c. a bottle.

Platinum In Canada

With the exception of a very few ounces of platinum obtained from the black sands of British Columbia, all the Canadian platinum and allied metals are obtained from the treatment of the Sudbury, Ontario, nickel-copper matte. The precious metal residues are allowed to accumulate over irregular periods before being treated, so that recoveries do not bear any definite relation to the quantity of matte treated in any particular year.

Will Burn Ice

Burning out of ice on the St. Lawrence River will be attempted by Dr. Howard T. Barnes, of McGill University, with whom the government has made an agreement from the department of marine and fisheries, the purpose being to free Montreal harbor from the grip of winter earlier than usual and to prevent the flooding of the country between it and Sorel.

Offer Reward for Cancer Cure

The grand council of the British empire cancer campaign has announced approval of an offer of two prizes of \$2,500 each, in 1931 and 1933, for the best original piece of work in the investigation of cancer carried out in the British empire.

Canada's Iron Industry

Hamilton and Sault Ste. Marie in Ontario, and Sydney, in Nova Scotia, are at present the great centres of the iron industry in Canada.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects where the child suffers from loss of appetite, in feverish conditions they will be found useful and they will serve to allay pain and griping in the stomach, from which children so often suffer.

Medial men will continue to walk in Bermuda. The House of Assembly has refused to make exceptions to a law prohibiting use of cars on the island.

Use Minard's Liniment for the Flu

Times change, and now the parent who provides spending money and doesn't interfere is called a good scout instead of a fool.

The silencer for firearms was invented by Maxim in 1909.

First American Forest Law

Was Written In Massachusetts Colony On March Twenty-Ninth, 1626

The Pennsylvania department of forests and waters at Harrisburg, recently conducted an investigation revealing that the first American forest law was written in the New Plymouth Colony, in Massachusetts. The original American forest law read as follows:

"Orders agreed on several times for the general good of the Colony: "It was decreed by the Court held on the 29. of March Anno, 1626. That for the preventing of which inconveniences, as does, and may befall the plantation by the want of timber, that no man of what condition soever sell or transport any manner of works or frames, for houses, planks, boards, shipping, shallop, bonts, canoes or what so ever may tend to the destruction of timber aforesaid."

Columbus As a Spaniard

Document Found Recently Would Indicate Birthplace of Explorer As Being In Spain

A document found in the archives of Pontevedra parish in Spain, mentioned that place as having been the birthplace of Christopher Columbus. It thus bears out the claim that the discoverer of America was a Spaniard and not a native of Genoa, Italy. The document contains a description of the burial of Columbus and said that the Duke of Veragua, descendant of the mariner, had sold in the 15th century the lands on which stood the building where Columbus was born.

Theory Of Relativity

Prof. Einstein Places Great Value On A Manuscript He Has Recently Completed

Prof. Albert Einstein has submitted to the Prussian academy of sciences a manuscript of five pages which it took him ten years to complete and which he considers of more importance than his widely discussed theory of relativity.

The manuscript contains mathematical and physical formulas amplifying the theory. It is a treatise in abstract mathematics dealing with the problem of merging mechanics and electric-dynamics.

Expensive Conversation

It costs big money to indulge in telephone conversations. A London visitor recently called an American business associate and talked 95 minutes. His bill was close to \$1,425.

A pleasant medicine for children is Mother Grave's Worm Expeller, and it is excellent for driving worms from the system.

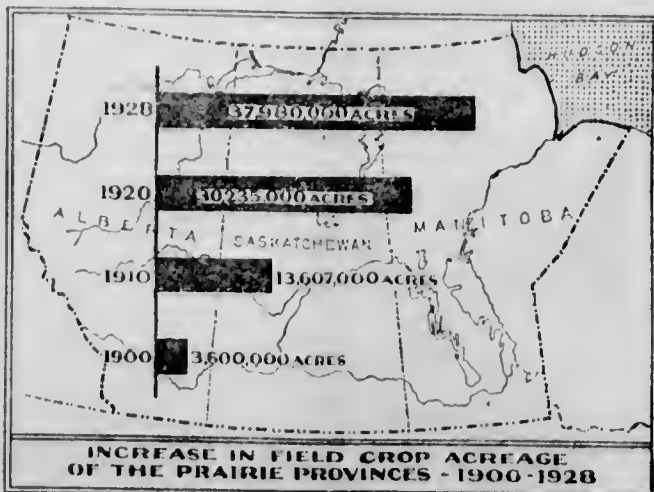

Saskatchewan mined 470,000 tons of coal during 1928, according to an announcement received from Ottawa. This is the same amount as was produced in 1927.

Groundwood Pulp

Groundwood pulp formed 58 per cent. of the total quantity of pulp made in Canada in 1926.

The difference between learning to drive a motor and learning to play golf is that when you learn to play golf you don't hit anything.

THE POWER OF WESTERN GROWTH

Contrasted with its spectacular speed in pre-war days, the course of prairie settlement in recent years has seemed slow and subdued. But as a matter of cold fact, despite the absence of sensational features, the expansion of agriculture on the prairie has been plowing ahead with tremendous power. The rate of advance, as indicated by Dominion Bureau of Statistics reports, is little short of amazing. Between 1920 and 1928, Manitoba, Saskatchewan, and

WEIGHING OF FOOD

You have suffered the annoying experience of having stringy foods wedge between your teeth; and you wonder what can be done to remedy it.

Normally, teeth should be tight together with rounded contacts as when two marbles touch; but through tooth decay and from teeth "drifting" this contact is lost.

The food then "jams" between the teeth and is held there until released—with what results?

Obviously, decay is liable to be incited in this area. Also this impacted food material presses upon the soft underlying tissues, until they become irritated and inflamed. Thus injured, they lose their "tone" and fall an easy prey to the microorganisms that caused diseases.

Then follows the destruction of this wedge shaped tissue between the teeth; a "pocket" is formed, which, becoming infected, results in the progressive destruction of the supporting structures of the teeth, which are then lost.

You see then, what grave damage can result from so simple a cause. Now, the remedy. It is not the tooth-pick, which, through its indiscriminate use, may do further harm, and which at best provides but temporary relief.

But, where this "wedging" is first noticed, the insertion of a filling in one or both of the involved teeth to restore the contact, will clear up the trouble.

This may even necessitate the removal of a faulty filling already in place but far better this than to suffer the prolonged discomforts from "wedging" food, with its train of grave consequences, should it go unchecked.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from paring corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, callouses or sore foot-lumps, use "PUTNAM'S"—it's reliable, and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Modern Books Short Lived

The life of modern books is much too short. When a good novel comes out it has its time of triumph, which seldom lasts beyond a year. After that it falls out of discussion, and instead of regiments of readers there are none at all. In July 200,000 people may be seeking a book and talking about it, and even reading it, and then with the first frost the matter is dropped entirely. When a popular success begins to decline it falls faster than an albatross.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

The latest wonder of agriculture, is a cabbage plant which produced six heads of cabbage in turn, one above the other.

SUNDAY SCHOOL LESSON

JANUARY 27

THE HOLY SPIRIT

Golden Text: "For as many as are led by the Spirit of God, these are sons of God."—Romans 8:14.

Lesson: Joel 2:28, 29; Luke 11:9-13; John 3:5-8; 14:16; 17:26; 15:26, 27; 16:7-15; Acts 2:1-21, 32, 33; Romans 8:1-17, 26, 27; 1 Corinthians 12:1-13; Ephesians 1:13, 14; 3:14, 21; 4:1-6, 30.

Devotional Reading: John 14:25-31.

Explanations and Comments

What the Holy Spirit Will Do, John 14:7-11.—Jesus told His disciples that it was expedient for them, it was for their advantage, for their best interests, that He should leave them. How could it be best for them to lose the daily companionship of their Lord and Master? Jesus gives the answer: "For if I go not away, the Comforter will not come unto you; but if I go, I will send him unto you." The Greek verb from which the Greek noun Parakletos, Paraclete, is derived, means to call to aid; the noun, therefore, stands for one who is called to another's aid, whether to comfort (comforter), to plead his cause (The Advocate), or to help in some other way (The Helper). The word Comforter used here for Parakletos, means One who strengthens, upholds, rather than One who consoles.

The Holy Spirit is (1) the continued life and presence of Christ Himself. While He was present with the disciples in the body, His humanity obscured in a measure His divinity. When the Holy Spirit took His place He revealed Christ to them, made plain all the spiritual truth of His teachings (verse 13). They knew Him better after He had left them. (2) While Jesus was with them, they were weak men, unable to stand alone. After He went away and left them as witnesses to carry on His work, they became towers of strength, wonderful leaders of men, who continued to do all that He began both to do and to teach. (3) By leaving a few, Christ became the Companion of all. While He was on earth He was with a few men in a small land; now He is with all, everywhere, at all times. He is the universal Spiritual Presence.

"He to His own a Comforter shall send."

The promise of the Father, who shall dwell

His Spirit within them, and the law of faith.

Working through love, upon their hearts shall write

To guide them in all truth."—Milton.

"We have no outside, distant, occasional Saviour, as the disciples had long ago; but His Spirit, His other Self, to abide with us, in us, today, tomorrow, forever."—Maltbie D. Enbeek.

Men outnumber women in the Irish Free State; the number of males being 1,505,889 compared with 1,465,103 females.

Honey production in British Columbia in 1928 is valued at \$216,855 and bees-wax at \$5,000. This yield is from 19,213 hives.

One million, four hundred and ninety thousand, three hundred and forty cows supplied milk to creameries in Canada during 1926.

Customer (doubtfully): "Is it a pedigree dog?"

Dealer: "Pedigree! Why, if this dog could talk he wouldn't speak to either of us!"

More than half of the known elements are metals—about 50 in all.

"Buckley's" for Throat Health

A slip night and morning relieves soreness and hoarseness, and prevents more serious developments. A bottle of Buckley's—40 doses for 75 cents—is an economical guarantee of healthy throats for the whole family. Pleasant to take—Instant in action—positive in relief. All druggists sell it.

Must Keep Drama Clean

Branshy Williams, English Actor, Deplores Modern Tendency

"I am ashamed of the way in which the stage is being run in the United States, Canada and Great Britain," Branshy Williams, English actor, said in addressing the Brockville Rotary club, adding that, for the sake of the rising generations, the stage has got to be kept clean and the pictures "must be kept cleaner." In moving-picture theatres, he said, boys and girls are today reading titles that are despoiling the English language, and on the stage itself there appears to be no longer room for good, clean, beautiful plays, while the hook-store's are full of questionable reading matter.

New Mining Regulations Have Been Approved And Are Now In Force

Ottawa.—New quartz mining regulations which were brought into effect by federal order-in-council last Friday were outlined by Hon. Charles Stewart Saturday afternoon. The new regulations, before being put into operation were submitted to the provincial governments of Alberta, Saskatchewan and Manitoba, and presumably were received with approval. The regulations governing mining in the west are now virtually the same as those in effect in the east.

The principal regulations provide: Instead of collecting royalty at the rate of 2½ per cent. of the sales of the product of the mines, as at present, there is substituted a tax of 3 per cent. of the annual profits over \$10,000 and up to \$1,000,000; 5 per cent. of the excess over \$1,000,000 and up to \$5,000,000; 6 per cent. of the excess over \$5,000,000 and up to \$10,000,000; and a proportional increase of one per cent. on each additional \$5,000,000. The royalty will accrue January 1 in each year and will be payable October 1 following.

Four-post staking of claims, instead of two-post. This has not received unanimous approval in the west, but, after considering all factors, Mr. Stewart decided to make the change. Four-post staking will remove many difficulties which arise under two-post staking, where claims frequently overlap and matters may be straightened out only after many vexatious delays.

Every person engaged in prospecting on Dominion lands and every person, partnership, or company desiring to stake out and record mining rights shall hold a miner's license. These licenses shall expire at midnight March 31 in each year, but shall be subject to renewal in but shall be subject to renewal in advance at any time. No license will be necessary when the final of mineral claim lease is issued and employees and others not seeking to record mining rights will not be required to be licensed.

Gigantic Wave Strikes River

New York.—Leonardo Fioroni, cook, was killed and several other members of the crew were injured by a gigantic wave that surged over the bow of the White Star liner *Majestic* on the crossing completed when the ship docked here. The wave twisted steel bulkheads, wet the masts, ruined part of the cargo and necessitated removal of the 289 third class passengers to other quarters.

Farm Loan Board Members

Ottawa, Ont.—Hon. J. A. Robb, minister of finance, has announced the appointment of Hon. E. C. Drury, former premier of Ontario and Beaudry Leman, general manager of La Banque Canadienne Nationale, as members of the Farm Loan Board. The board is now fully constituted with Mr. Robb as chairman and Dr. J. D. MacLean, former premier of British Columbia, as farm loan commissioner.

Fear Revolution

New Orleans, La.—Isaac Lehman, representative of a New York cotton goods manufacturer, arrived here with a report that United States citizens and other foreigners were fleeing Spanish Honduras in expectation of a revolution.

Western Pioneer Dead

Major Augustus Mills Came to Winnipeg in 1870

Winnipeg.—A pioneer of early western Canadian military expeditions, Major Augustus Mills, 70, is dead at his home here. He came to Winnipeg in 1870 as a member of the first Lord Wolseley expedition, and later participated in the rebellion in 1885 as a captain in the Kilodonian Infantry, which made a far western march in search of the Indian chief, Big Bear.

For a time he was a Dominion government land agent and then, in 1883, was appointed deputy protonotary at the Manitoba law courts, a position which he held at the time of his death.

Flu Fatal to Eskimos

Ten Per Cent of Population Sneeched to Disease Last July

Toronto.—Severe as the present influenza epidemic may have been in the older sections of Canada, it might be termed but an echo of the widespread disease that ravaged the Mackenzie River district last summer. Approximately ten per cent of the Eskimo population lost their lives in the influenza epidemic which swept through the district last July, according to Archdeacon W. A. Deddes, who was in Toronto recently.

Wins I.O.D.E. Scholarship

Victoria, B.C.—Miss Sylvia Lettice Thrupp, B.A., daughter of E. C. Thrupp, of Kamloops, B.C., has been awarded the \$1,200 I.O.D.E. overseas post-graduate scholarship for 1929-1930. Miss Thrupp is now taking her M.A. course at the University of British Columbia, where she is assistant in first year history. She intends to take up her I.O.D.E. scholarship in London, where she will study at the Institute of Historical Research, University of London.

Favor Old Age Pensions

Lethbridge, Alta.—Old age pensions will be urged upon the Alberta government by the Alberta federation of labor as a result of a resolution passed by the delegates at a recent session. Alberta is the only western province which has not now this legislation in force and the labor men are determined that enabling laws shall be passed at the coming provincial session.

Salary Revision For Mail Clerks

Ottawa.—New classification and salary revision for mail clerks throughout the Dominion is considered probable by J. P. O'Farrell, of Quebec, president of the Dominion Railway Mail Clerks' Association. Mr. O'Farrell expressed himself thus after appearing before the Civil Service Commission with proposals along these lines.

Will Participate In Scheme

Regina.—Manitoba will again participate in the British boy immigration scheme it has been announced by Hon. Albert Prefontaine, Minister of Agriculture for Manitoba who stated that a requisition would be forwarded to the British authorities to bring 50 youths to that province this spring.

Reparations Conference

Reported Meeting Will Be Held In Paris In February

Paris.—It has been intimated that the reparations conference will meet in Paris about February 9, and in addition to Owen D. Young, former agent general of reparations, J. Pierpont Morgan is expected to take an important part in the discussions.

As far as could be learned from a canvass of the interested officials no one seems to have any definite plan to submit. All the experts have ideas and some have a few constructive suggestions, but none have extensive programs.

The British experts, it is understood, will assume a waiting attitude, and the initial discussion is expected to be between France and Germany. The Italians will content themselves with trying to retain what they have already secured and Japan will trust to what turns up.

Will Sail For England

New Earl of Egmont to Leave About 2nd of February

Calgary.—The new Earl of Egmont, Frederick Joseph Trevelyan Percival, who for the past thirty years has been ranching in the Calgary district and who recently fell heir to a big estate in Great Britain, will leave about the end of February for England.

He will be accompanied by his fourteen-year-old son and heir, the Hon. Frederick George Moore Percival, and Mr. and Mrs. Harry Trimmer, of Priddis, who have been friends of the new earl for many years.

Capital of Barclay's Bank

Amount Will Be \$500,000 With Same Sum as Reserve

London.—Barclay's Bank of Canada, when incorporated, will have a capital of \$500,000 and a reserve of a similar amount. P. C. Goodenough, chairman of Barclay's Bank, Limited, said at the annual meeting.

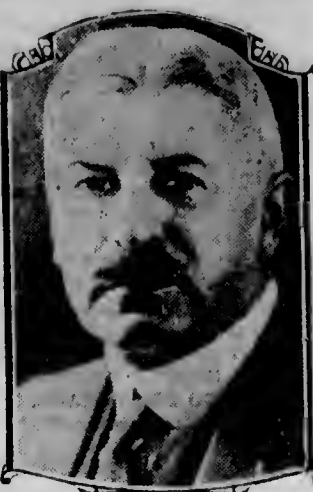

Sir Robert Laird Borden, former premier of Canada, had accepted the chairmanship of the new bank and the directors included Premier L. A. Taschereau of Quebec, he added.

Application for a charter for the bank will be made at the coming session of the Canadian parliament.

Ask Customs Rebate

Ottawa.—The government is being asked by the British Columbia Sugar Refining Company to include in the forthcoming estimates the sum of \$56,821.88 with interest, being the balance of \$59,338.83 claimed to have been overpaid by the company in custom duties.

RETIRE FROM BUSINESS

After 42 years as assistant manager of western business for the Canadian Bank of Commerce, C. W. Howley has retired from business. He is recognized as one of the leading bankers of Canada, and is well known in the west.

Railroad Wreck Was Caused by Drunkenness

Roumanian Train Crew Responsible For Death of Fourteen Persons

Turnover, Roumania.—Railroad inspectors said that drunkenness on the part of the engineer and crew of the Bucharest-Temesvare express cost the lives of 14 persons. In addition to the fatalities about two score passengers were injured at Turnover, near here, when the express crashed into a local train which had been derailed.

The express was plunging along at 55 miles an hour in the dead of night when the crash occurred. The engineer of the express, which was heavily laden, was apparently blind to all signals. In their excitement over the derailed local train station officials apparently forgot about the onrushing Bucharest express, which ploughed into the passenger coaches of the local train like a catapult.

Free Trip Offered Students

Paris.—A free trip from Montreal to Paris with expenses for a 15-day sojourn at his hotel to the student graduating with highest honors at Canadian Universities is to be offered by J. G. Mettraller, administrator of a Paris Hotel, if arrangements can be made with Canadian University heads. Mettraller is president of several hotels in France and Switzerland.

Boys' Tour Postponed

Toronto.—The proposed tour of 1,000 British boys to Canada and 1,000 Canadian boys to Brandon has been postponed until 1930, according to a cable received here by the Toronto board of education.

CANDIDATE FOR THRONE

Count Folke Bernadotte, of Sweden, shown above, with his bride, formerly Miss Estelle Manville, of Pleasantville, N.Y., is one of the two foremost candidates for the throne of the United Baltic Kingdom, which it is proposed to form by merging Estonia, Latvia and Lithuania.

Grain Enquiry May Be Extended Over Three Western Provinces

Asks For Government Aid

Red Cross Society Requests Contribution Towards Its Support This Year.

Ottawa.—Since the war the total disbursements upon Red Cross activities throughout Canada have amounted to approximately seven million dollars. The cost of the national aspect of this work has been \$937,269, and this has been met entirely from the capital funds of the society.

The above facts are among a large number comprised in a brief which was presented to Premier Mackenzie King and Hon. James A. Robb, minister of finance, by a delegation representing the Red Cross Society. The delegation came to the government to ask for a contribution of \$25,000 for its support this year.

Premier Mackenzie King, while expressing his personal sympathy with the Red Cross and appreciation of what the society has accomplished expressed the opinion that there was a danger in government assistance to such an organization as the Red Cross. The danger was that the people, upon which it must depend for its support would become indifferent and fail to contribute when they realized that it had obtained government backing.

Mr. King assured the delegation that he would place its brief before his colleagues, and he said that they must not feel that his remarks were intended merely to discourage.

Great Increase Shown In Canadian Trade

Advance of Nearly 235,000,000 During Last Nine Months

Ottawa.—Canada's total trade advanced nearly \$235,000,000 during the last nine months of 1928. The total of \$2,007,500,158 compares with \$1,773,092,834 for the corresponding period in 1927.

Figures were made available in the department of national revenue. Domestic exports were valued at \$1,071,647,161, an increase of \$121,542,797 over the comparative figures of \$950,104,367 in the previous year. Wheat exports alone moved upward more than \$81,000,000, while newsprint and automobiles were substantially heavier.

Receives New Appointment

Ottawa.—Canada's recently appointed chief of staff of the Department of National Defence, Brig. Gen. A. G. L. McNaughton, has been elevated to the rank of Major-General. The appointment is post dated to take effect from January 1, 1929.

Tennis Champion Engaged

Berkeley, Calif.—Engagement of Helen Wills, national women's tennis champion, to Frederick Shunder Moody, Jr. San Francisco stock broker, has been announced.

Regina.—With the object of expediting the work of the Royal Commission, appointed recently by the Government of Saskatchewan to inquire into the grading, mixing, handling and marketing of grain—which Commission is now sitting in Regina following a series of public meetings at other points in the Province—a Royal Commission was issued to its members from the Government of the Province of Alberta under the signature of Hon. Jas. E. Brownlee, Premier of Alberta and President of Council, signed by the Lieutenant-Governor of that Province.

It is also understood that the Government of Manitoba has agreed to issue a similar Commission to the Saskatchewan enquiring body.

The issuance of the Alberta Commission places the members of the Saskatchewan Inquiring Commission in this position: That should they decide to carry their inquiry into Alberta they will have all the powers, rights and privileges of a Royal Commission of that province appointed under the Public Inquiries Act of Alberta.

For the first time in the history of western Canada, an enquiring body of one province has, by the action of the Alberta government become the enquiring body of a sister province. The Commission, as issued by the Alberta authorities, appoints Chief Justice Brown, Dean Rutherford and J. A. Stoneman, the members of the Saskatchewan body, Commissioners in Alberta with F. Hedley Auld, deputy minister of agriculture for Saskatchewan Commission, secretary to the same body in Alberta.

In its wording, the official document from Alberta is similar to that issued by the Saskatchewan Government and permits the Saskatchewan Commissioners to hold public sittings in Alberta, summon witnesses, take evidence under oath, compel the attendance of witnesses and production of papers and, generally to carry out its inquiry in that province in the same manner as it has done in Saskatchewan and with exactly the same powers as it now possesses.

Farm Loan Board

Ottawa.—While no announcement has yet been made as to the personnel of the farm loan board who will act with Dr. J. D. MacLean, former Premier of British Columbia, and recently appointed to the chairmanship of that body, the understanding in the capital is that Hon. E. C. Drury, former premier of Ontario, and Beaudry Leman, president of the Banque Canadienne Nationale, will be named.

Children Victims of Ranch Fire

Winnipeg.—Two young children, one six months old and the other two years, were burned to death when fire destroyed a ranch home near Arden, Manitoba, south of here.

United Farmers of B. C. Will Enter Appeal For Better Freight Rates

Vancouver. Backed by the United Farmers of the three prairie provinces, the United Farmers of B.C. will carry British Columbia's claim for better freight rates to the governor-in-council at Ottawa.

The appeal has been prepared and forwarded to Ottawa by G. G. McGeer, K.C. The appeal involves three requests: That export grain rates on the Canadian Pacific Railway to Vancouver be reduced to the level obtaining at Port William; that domestic grain and flour rates over both trans-continental lines be reduced to the level obtaining to Port William and the removal of the mountain differential in all freight rates covering the movement of all traffic into, from or through British Columbia.

Mr. McGeer will conduct the case at Ottawa when argument is heard. Mr. McGeer will also continue his appeal to the board of railway commissioners for leave to appeal to the Supreme Court of Canada from the commissioners' decision in the matter of domestic grain rates.

Mr. McGeer announced his intention of appealing direct to the governor-in-council before the board of railway commissioners. Later, however, when the board gave permission to Leon J. Ladner, K.C., who represented the attorney-general of British Columbia, permission to make formal application for extension of time in which the appeal would be made, Mr. McGeer said that if the attorney-general was going ahead with the appeal he was also going to ask for leave to appeal on behalf of his clients to the supreme court.

J. E. McMullen, acting for the Canadian Pacific Railways, said the application was one that should be answered by the rail board at Ottawa. H. W. Hamington, counsel for the Canadian National Railways, supported Mr. McMullen's argument.

The chief commissioner, H. A. McKeown, said that in view of the circumstances connected with the application, and the fact that no notice had been given the railways, the application might very well be heard in Ottawa.

W. N. U. 1769

Manufacturers' Ass'n Ask Government For Further Tax Reductions

Hamilton, Ont. The report of the special committee on taxation was presented at a meeting of the Canadian Manufacturers' association. It recommended consideration by the government of a method to avoid "double, and in many cases triple taxation," which, it was held, occurred through taxation of net earnings of corporations and the personal income tax, which applied to dividends. Reductions of the personal income tax, reduction and final abolition of the sales tax, and a reduction in the excise taxes on finished goods were other recommendations.

An important closed meeting of the council of the association was held at which over 200 members from all over the Dominion were present. A luncheon was also held, when Sir Joseph Flavelle, Toronto, spoke on "Industrial Research." He said: "Premier Ferguson, some time ago promised \$1,000,000 towards industrial research if the association raised a similar amount. We have since collected \$1,500,000, and the premier has challenged us to make that \$2,000,000, with the promise that the government would advance a like amount. It is for us to accept this challenge," said P. F. Money Penny, chairman of the Ontario division of the C.M.A.

Sir Joseph Flavelle said that Canadian manufacturers were behind their British and American competitors in applying science to their business.

CHAPTER XII.—Continued.

Andy took the wounded bird from her hand. "Ow did it happen, Connie?" he asked tenderly.

Connie was as open and unaffected as the wild birds of the forest. She was as capable of hating as she was of loving. Her eyes were laughing eyes, and the soul that looked out of them merry soul, but she had a temper, and under sufficient provocation her blue eyes could take on a dangerous glow.

She now turned like an enraged lioness on the foreigner. "He killed it with a stick!" she cried furiously. "You brute, you cowardly brute. . . ." In her rage her voice became incoherent. With hands clenched and with breath coming in short gasps, she moved nearer to the object of her hatred. In her hysterical anger her voice rose almost to a scream.

"You cur, if I were a man I'd—I'd kill you!"

The cry came to Donald's ears, and he was off up the trail like a deer.

"Go ahead, I'll follow," responded Gillis.

Andy looked down on the mother goldfinch as it lay in his hand. He felt the quick throbbing of his heart grow fainter and fainter. One wing was broken and its white breast was stained with blood. The bird's head drooped lower, and a film settled over its bright eyes. The beautiful wings stretched rigidly, and it gasped convulsively, sending a tiny stain of crimson from its mouth that felt warm on his palm.

Andy's face became colourless. His hand shook violently as he placed the dead bird tenderly on the ground. "Connie dear," he said, in a voice that trembled, "I ain't a whole man, but here's where you see 'arf a man goin' into battle to give all he's got."

He removed his coat and threw it from him. Through a rage-mist Andy saw the grinning foreigner throw up his arms in an absurdly unscientific posture of defence. Like a mad cat, Andy launched himself straight at his husky opponent. The grin was wiped from the big man's face by Andy's compact fist, as it smacked resolutely on the end of his thick nose with a snap like that of a whip, and with a skilled force that brought blood.

Andy's years of training boxers now stood him in good stead. He well knew that a small man would stand little chance in long range fighting, and he kept well inside the larger man's wild swings. With his blond head tucked against his adver-

sary's body, his fists worked like pistons; he kept sending short jolts to the body that brought heavy grunts every time they landed.

Connie was delirious with excitement.

"Hit him, Andy! Hit him! Good! Good!"

And then she groaned as the big man's hand found Andy's throat and flung him to the ground. Little Andy was up immediately, but stepped into a swinging fist that caught him over the eye and sent him sprawling. Undaunted, he came to his feet, waited warily for an opening, and again sprang under the big man's guard.

Andy's fist shot up in a rippling uppercut that was judged to a nicety, catching his opponent on the point of his chin with force enough to send him rocking on his heels, and before he could recover himself the same fist, accompanied by its mate, beat a tattoo on his solar plexus.

In desperation the bewildered man wound his arms about the little Australian and lifted him high in the air. Like a game bulldog Andy hung on. Though his feet were off the ground, he clung to the big man's body like a leech.

Again the big hands felt for Andy's throat, and he was flung six feet to strike with a thump that shook every bone in his body. Connie cried out in fear as he narrowly avoided a brutal blow aimed at his head.

Andy's sense of British fair play had received a rude shock. "As Me-thusalem said," he panted, as he came to his feet, "when in Bohunkin do ns the Bohunks do."

"Take that, Spaghetti!" he shouted, as he kicked the foreigner viciously on the shin. While the latter leaned over in pain, Andy shot a well-directed uppercut to his face. The big man sat down, a dazed look in his eyes.

Breathless, Donald arrived on the scene, with Gillis puffing in the rear.

Breathing heavily, Andy's adversary came to his feet, picked up his hat, and with arms wound about his head beat a hasty retreat. Andy was after him like a hornet, sending stinging blows through his vulnerable mouth. Donald and Gillis stood with mouths agape to see Andy administering a sound thrashing to a man twice his size. Right to the edge of the woods he relentlessly pursued his fleeing enemy.

Andy's head was held at its usual cocky angle, and he assumed a swagger as he retraced his steps, but his short legs wobbled and he sank dizzily to a stump.

"I brought 'is bluklu' meat-ouse down, Connie," he gasped.

"Oh, Andy, you're a darling!" she cried, throwing her arms impulsively around the little man's neck, and touching her lips to his cheek.

Andy's florid face took on a deeper magenta, and he blinked hard to hide certain signs of emotion. He afterwards admitted to Donald that he was no "sweet sixteen," and that it was the first time that he had ever been kissed in his "bloomin'" life.

Connie wet her handkerchief in the cold water of the creek and bathed his face with tender care.

She showed Donald and Gillis the rest with the motherless birds, doomed to die in premature death by this act of wanton cruelty, and pointed to the tiny bird on the ground, for whose untimely end Andy had taken a well deserved and summary vengeance. Connie choked as the lovely male bird flew to a stalk of goldenrod near its dead mate and sent out its throaty warble.

"Dear, dear, dearie," sang the goldfinch in a plaintive, questioning note.

Andy presented a pitiful figure with an eye closed, his lips swollen. His face bruised, but the indomitable spirit of him shone from his one bright orb.

"You darned little huzz-saw!" said Gillis tenderly.

Donald slapped his little friend on the back, his eyes shining with admiration.

COUGHS

are Nature's signals warning that resistance is broken and the body undernourished.

Scott's Emulsion

is a blessing to all who need strength. It helps keep the body vigorous and healthful. Try it!

Scott & Bowne, Toronto, Ont. 25-59

CHAPTER XIII.

Renwick announced that Robert Renale's daughter and a party of girl friends were to visit Summit Lake the following week, and carpenters were not to work erecting cottages for their accommodation.

A few days before her arrival Donald was both surprised and pleased to receive a cordial letter from her in which she said that she was looking forward with pleasure to the coming holiday, and that she would deeply appreciate anything he might do for the entertainment of her friends.

As always, her father spared no expense in providing for the comfort and pleasure of his daughter. That week a car containing a motorboat, canoes and six saddle-horses was run in on a side-track at the mill.

Connie learned of the coming event through Donald as she was watching with keen interest the unloading of the spirited animals.

"You will enjoy yourself next week, Connie," he said gaily. "Miss Renale is coming with friends. We'll have rides, picnics and dancing."

A few minutes later Connie joined Andy, who sat on the steps of the kitchen door enjoying a breath of fresh air.

"Is Miss Renale rich, Andy?"

"An 'ole harrel o' dough."

"Is she beautiful?"

"I've 'eard so, Connie."

A short pause ensued while she searched the pockets of her overalls and produced several neatly folded papers. She extracted one, pressed it smooth, then passed it to Andy.

"Does Miss Renale dress like that?"

It was a photograph of an actress dressed for the street, taken from one of the magazines that Donald had given her.

"I think so, Connie."

"Oh! She must be wonderful, then!" said Connie earnestly.

She moved closer to Andy, unfolded another page, and spread it on her knee.

Andy bent his blond head close to the one of gold. A startled look crossed his features and his brows bobbed up and down. It was a full-page advertisement of ladies' lingerie. The highly coloured illustration of a lady, partially dressed, achieved its object of arresting the eye, while the remainder of the space was occupied by articles of apparel similar to those adorning the lady's graceful form.

Andy coughed. "Er—yes, Connie."

Connie raised her eyebrows incredulously.

"All at one time?"

"Sure—sure," mumbled Andy.

Connie stared. "Why, there must be nearly a dozen pieces. How is this fastened?" she questioned as she pointed with a slender brown finger to one of the engravings.

Andy took a quick glance. "Buttons."

"And this?"

"Buttons," replied Andy, gripping the hawl of his pipe and sending out clouds of smoke.

"And this?"

"Strike me blind, what a 'ell of an 'ole," thought Andy.

"Buttons," he responded desperately without looking at the paper.

(To Be Continued.)

Canada's Historic Sites

The Historic Sites and Monument Board of Canada is composed of historical authorities, and one of its duties is to recommend to the Department of the Interior, historic sites worthy of being marked, restored, or preserved. The board meets annually to consider the various sites brought to their notice and forwards its opinion to the Department of the Interior which makes the decision and carries out the work through the National Parks of Canada Branch.

"Your girl is a blonde, eh? Suicide or natural?"

"What do you mean by suicide blonde?"

"One who dyes by her own hand."

Sulter—And, darling, let's be married soon.

Film Actress—Sure. Let's make it next week. I've never been married in January before.

Minard's Liniment for Coughs and Colds.

Quality Of Canadian

Goods Has Improved

Research And Skilled Labor Have Been Big Factors

The quality of Canadian products is steadily improving, with greater knowledge of research, scientific methods, processes, application of skilled labor and the needs of buyers. In the face of mass production competition, Canadian producers are seeking to hold their places by giving special service, better quality or distinctive features to their products. That they are succeeding is proved by the fact that Canadian manufactures are exported to over a hundred countries, while supplying the greatest part of domestic needs. A still greater share of the home market would result in more production, more employment and more exporting, and it is therefore important that home industry should be encouraged by stabilization and other necessary measures as much as possible.

Recipes For This Week

(By Betty Barclay)

RICE AND SALMON SALAD

Take equal parts of salmon and cold boiled rice; stir with a fork until the fish and rice are thoroughly mixed. Pour into a salad dish and cover the whole with mayonnaise or hollid dressing.

Canned tuna fish, left-over chicken, meats, ham, or vegetables can be used in the same manner—always use equal quantity of rice. The addition of celery and hard-boiled eggs make a more elaborate dish.

SANDWICH FILLING

One pound of mixed nuts (be careful to keep small particles of shell from clinging to the meats). One cup seedless raisins. Grind together in a food grinder, add a little salt and the juice of one small orange. Work together very thoroughly, place in a glass container and keep in a cool place. Can be used between thin, well buttered slices of whole wheat, white or bran bread. Ideal for school lunches, workman's lunches or picnics.

Already Advised

An "accident" case, in which the patient was suffering from a wound in the head, was taken to hospital. After taking the usual particulars as to age and next of kin, the official said: "Now, don't worry, I shall take immediate steps to ensure your wife being advised of your detention here, and so save her from anxiety." To which the patient resignedly replied: "She did it, Miss!"

Sixteen hundred different noises disturb Milwaukee, according to police survey.

Hewitt—"Can you get your wife to try the budget system?"

Jewett—"No; she won't budge."

Congress Of Nurses

Delegates Coming To Montreal Convention From Many Lands

For the International Congress of Nurses, to be held in Montreal, in July, acceptances have been received from the following countries to date: Great Britain, United States, Australia, New Zealand, Hawaii, India, South Africa, Irish Free State, France, Belgium, Germany, Switzerland, Poland, Spain, Italy, Bulgaria, Austria, Greece, Turkey, Yugoslavia, Czechoslovakia, Latvia, Estonia, Sweden, Norway, Holland, Denmark, Iceland, Cuba, Java, Philippine Islands, Brazil, Ecuador, Argentina, Chile, China, Japan, Korea, and Syria.

Trappers Use Airplanes

Bring Furs From North Country To Winnipeg By Modern Methods

For the first time in history, an airplane has been carrying furs from the wilds of Northern Manitoba to the Winnipeg market. Hollick Kenyon, aviator, left Cranberry Portage for Brocket settlement the other day, taking Del Symonds, veteran trader, whose aim was to beat all competitors, who take a month to travel by dog team.

She—"Alfred, I know I have my faults."

He—"Yes, dear."

She (frigidly)—"Then perhaps you'll tell me what they are."

Little Helps For This Week

"As we have therefore opportunity, let us do good unto all men,"—Galatians vi. 10.

The means that Heaven yields must be embraced and not neglected.—Shakespeare.

Miss not the occasion; by the forelock take.

That subtle power, the ever-haunting time.

Least a mere moment's putting off should make

Mischance almost as heavy as a crime.

—William Wordsworth.

It is decreed in the providence of God that although the opportunities for doing good, which are in the power of every man, are beyond count or knowledge, yet the opportunity once neglected, no man by any self-sacrifice can atone for those who have fallen or suffered by his negligence.—Julian Horatia Ewing.

Easily Done

George (nervously): "I'd like best in all the world, Rose, to marry you, but I don't know how to propose."

Rose (promptly and practically): "That's all right, George, you've finished with me. Now go to father."

Actor—"I say, you know I'm getting awfully popular. I see some tobacco people have named a new cigar after me."

Manager—"Oh! Well, I hope it'll draw better than you do!"

WINDOLITE

The Improved
Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

When Pain
Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has been refined the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

PAUL H. KAMURA

DENTAL TALKS by Dr. H. Harcourt Heal

There was a time when the only way to handle a decayed or defective tooth was to pull it out. Then came the period of filling repairing. Today, we are in an era of preventive cleaning, and the use of methods planned to produce sound teeth and to save them, rather than to repair them or provide substitutes after irreparable damages. In such preventive work, we are beginning to appreciate what the tooth-brush can do, more than we have ever done in the past.

The modern tooth-brush may not be perfect, but its present status is a matter of evolution from the "chew stick." One end of a wooden twig was beaten to a soft, fibrous condition in early days, and the primitive brush was ready for use.

The morning ablutions of a native of India are never complete unless the teeth have been cleaned and the mouth thoroughly washed. No food may be eaten until the ceremony is over. However poor the Hindu may be a bundle of little white sticks is kept on hand and one is withdrawn each day to be used for scrubbing the teeth once used it is thrown away, and it is broken in two before being discarded so that it will not be used by anyone.

Some negroes in an "African village" were observed cleaning their teeth with such an instrument. They carried a small supply of them secreted in some fold of the clothing, and it would seem that they were cleaning their teeth when not otherwise employed. Their teeth were beautifully white, and no decided recession of the gums or pyorrhoea could be noticed.

This early tooth brush has a number of good points. A positive pressure can be applied, and the fibrous end is so soft that the gum can be given a gentle massage. It is so cheap that it can be used and thrown away, and this is ideal from a sanitary point of view. However, it can be used only with the up and down movement and does not get into the interdental spaces and deep fissures, and I believe that these spaces are really the most important of all in preventing disease of the gums and teeth, the most common ailment of modern man in particular.

Of all diseases with which mankind is afflicted, the most prevalent are diseases of the gums and the teeth. Pathological conditions have always, to some extent, been present in the mouth, but unlike many other diseases which have diminished in severity in modern times, mouth conditions, in our time, have been growing steadily worse.

People who are free from tooth decay are led to believe, after reading the phrase, "a clean tooth never decays," that they are free from mouth ills, when if the truth were known, they are in more serious condition than if they had some decay. One of the most treacherous characteristics of pyorrhoea is that in 95 per cent or more of cases, no decay or pain is present, with the result that the first examination reveals an unsuspected and serious condition. The stimulating of the gums that is accomplished with the bristles in ordinary brushing does not have the required effects.

To correctly clean the teeth and stimulate the gums use the straight across motion first; then the up and down motion. Lastly push the bristles of your brush straight in between the teeth and whilst keeping up pressure, set up a small rotary or vibrating motion. This will bring the bristles in touch with the interproximal sides of the teeth and at the same time stimulate parts of the gums inaccessible by any other procedure.

Any individual who will at least, twice daily, carefully cleanse his mouth in the above described manner and in addition visit his dentist at least every six months, might confidently expect satisfactory results from dental work performed, as well as long and satisfactory service from his teeth.

It has been said that a clean tooth never decays. This sentence was easy enough to say, but it is not so easy to do, and stimulated gums never show pyorrhoea.

WANTED

TO RENT—60 acres of land for potatoes and beets by two men.

H. RENTMEISTER

Gardner Raymond

At The S. of A.

Principal O. S. Longman returned on Saturday morning from the Provincial Seed Fair at Edmonton. Mr. Longman acted as one of the judges in the oats and barley classes and reported very keen competition, especially in the case of the oats exhibits. The Athletic Association are holding the Annual Athletic dance in the school assembly hall on Friday evening, January 25. The decorations and happenings will be unique but, these are surprises, so I must refrain from telling anything more.

The Aggie staff is having a little bad luck in the volleyball league up to date. In fact the records show four games played and four lost but we are not discouraged and are looking for a reversal of form soon.

We are very pleased to report the arrival of Mrs. Haworth in our staff circle. The Doc. is now like a tickled boy and he even sings on his way to lectures.

The School of Agriculture basketball team are guests of the Lethbridge Aces to-night in the latter's stronghold. Our team has yet been rather unfortunate in the matter of games won but it is expected that they will do their part in making a real game at Lethbridge.

Mr. Russel Love, M. L. A. (Wainwright) and secretary of the Alberta Dairy Pool will give two lectures in the school of Agriculture on Monday morning and afternoon of January 24. Mr. Love's subject will be special reference to the Dairy Pool.

We are very sorry to report an odd case of mumps among our students. The principal is co-operating with the local health authorities and it is hoped that the sickness will soon be stamped out.

Mr. Angus McDonald instructor in Dairying arrived this afternoon and we are all looking forward to the music of the cream separators and churns.

The majority of the staff members journeyed to Lethbridge on Saturday where they took in the Dumhelly's show. The weather was quite cold but nevertheless everyone was quite satisfied as the show was of a very high caliber. In fact it had such an effect Mr. Asplund that he did not return until the next day.

Mr. Frank Stephens Provincial Government Weed Supervisor was a visitor at the school last week. Mr. Stephens is a graduate from Olds so consequently was right at home among the staff in which are several Olds graduates.

The Schools of Agriculture offer a free course in Agriculture and Domestic Science to the young men and women of Alberta. This is one of the best courses obtainable anywhere in the Dominion of Canada, and Mr. Longman Principal of the Raymond School will be pleased to furnish any desirable information.

In an effort to co-operate with Home Dramatics The Capitol Theater will be dark next Wednesday when "PICKLES" will be presented in the Opera House.

FOR SALE—Sanitary couch, good as new, also Mason Hamilton organ. Apply Mrs. Ed. Nilsson.
